WHY THE U. S. WASHING MACHINE IS THE BEST BECAUSE

It is the only Rotary washer that has revolving steel ball gearing reducing the friction and thus making machine so light running and almost noiseless.

The gear wheel turns right or left, the pin wheel or dasher reverses automatically, turning the clothes back and forth through the hot soap suds and cleaning them without rubbing them to pieces.

Over one hundred thousand in use. The U. S. Machines have no equal because they wash clean.
